VERIFIED PROFESSIONAL EXPERIENCE

Resume & Cover Letter Writer / Quality Reviewer | Remote service work

- Delivered 25,000+ resumes and 10,000+ cover letters using role-specific rubrics, revision control, factual consistency checks, and strict formatting QA.
- Converted incomplete client histories into concise, audience-appropriate documents while resolving inconsistencies and preserving tone, terminology, and constraints.

Sales Performance & Team Coaching | AT&T channel

- Ranked #1 performer in 28 of 31 months; coached the district's bottom 25 employees using defined standards, structured feedback, and repeatable performance reviews.

Distribution Designer II & Quality Control Technician | Utility infrastructure

- Reviewed fiber and utility designs for accuracy, NESC compliance, pole loading, permitting, and downstream construction risk using AutoCAD, Katapult, IKE PoleForeman, SpidaStudio, and Magellan.

SELF-DIRECTED AI EVALUATION & INTELLIGENCE SYSTEMS

Gemini Evaluation Operating System | Self-directed framework development

- Structured four analyst personas, four domain playbooks, and 17 tactical modes covering source audits, assumptions, base rates, red-teaming, timelines, network power, and scenario trees.
- Created a Record Lock Gate, Tier 1–5 evidence hierarchy, confidence bounds, falsifiers, and AURORA GRID handoff format to keep facts, inferences, and forecasts traceable.

COMMAND / AURORA GRID / CLIA / Multi-Agent Workflows | Public portfolio + self-directed systems

- Developed COMMAND, a model-agnostic four-agent Epistemic Rigor Framework for calibration, fallacy detection, source verification, red-teaming, and constraint mapping; integrated AURORA GRID / AAIK learning assets.
- Connected verification, forecasting, action, and feedback into documented loops; operated 4- and 16-agent Grok workflows with parallel research, specialist review, consensus checks, and single-leader synthesis.

EDUCATION

High School Diploma | James Madison High School | 2004–2008

RELEVANT SKILLS

Evaluation operations • Rubric and SOP design • Assignment tracking • Calibration and adjudication • Error analysis • Failure-mode reviews • Source verification • Confidence calibration • Multi-agent orchestration • Research documentation • GitHub • Linux • Google Workspace • Excel
